

## NEDAL PASSIVELY SAFE COLUMNS

## THE NEW STANDARD IN **70/100 NE3**

Nedal aluminium lighting columns for provincial roads, highways and highway exits are certified in the 70 & 100 NE3 safety category. This means they meet the highest European demands on collision safety. Nedal lighting columns are reliable, safe and offer a unique innovative shear-off construction. Lighting columns that contribute to traffic safety.

### Why **Nedal**

- ✓ Longer lifespan
- ✓ Low maintenance
- ✓ Climate neutral
- ✓ Production based on CSR (Corporate Social responsibility)
- ✓ CE-certified

# Environmentally conscious and climate-neutral

Aluminium lighting columns in themselves contribute significantly to reducing environmental impact as compared to steel columns. They require less maintenance and have longer lifespans. We include our environmentally conscious and climate-neutral manufacturing processes. This is reflected in our commitment to using as much recycled aluminium as possible without affecting the quality of the final product. Our Cradle to Cradle certification is one example of our philosophy and methods.

**Nedal**  
passed  
every test!

We will be pleased  
to tell you more

## Nedal passively safe lighting columns offer many advantages:

- ✔ 360-degree applicability
- ✔ Unique patented shear-off construction
- ✔ Passive safety classification 70/100 NE3
- ✔ Suitable for different soil types
- ✔ Quick installation
- ✔ Product-specific transport packaging
- ✔ Includes shear off / strimmer protection
- ✔ Suitable for most wind zones
- ✔ TASS & MIRA tested

## Reliable and safe shear-off construction

The unique and patented shear-off construction is characterised by simplicity and reliability. In the event of a collision, the column shears off the base immediately. The damage to the vehicle, occupants and the column will be limited. Nedal passively safe columns not only allow you to meet all requirements, they also help you contribute to the safety of all road users.
