### **Update - CoVid19/Coronavirus**

We have entered week 4 with numerous restrictions due to the epidemic, knowing that at least three weeks like this will follow. Fortunately Nedal does not have any confirmed cases of Corona. We hope that you, your colleagues and beloved ones remain in good and healthy condition as well.

Our operations have continued on a slightly adjusted scale with no major impact on delivery performance, neither have we encountered any major interruptions in our supply chain. A special thanks to all employees, in particular the ones at the plant site, in adjusting to the new health and safety regulations and serving our customers!

Each and every one of you being a customer or supplier, thanks for adapting quickly and efficient to this exceptional situation and keeping the business going as good as you can! Together with you and our dedicated staff we will continue keeping the business going as close to normal as possible.

The health and safety rules and regulations of our Ministry for Public Health and Welfare ("RIVM") are leading and continue to be our highest priority, with no exceptions! Only if we all together respect and obey the rules, we can overcome this challenging situation.

Our management, including representation of our shareholder Purso in Finland, are closely monitoring the situation on a day to day base. We are updating our Nedal people on a regular base about the issues relating this epidemic.

Stay positive, remain healthy and look after each other!

Marcel T. Veldman

Managing Director
